

data visualisation with Tibco Spotfire®

Be able to analyse data and communicate its interpretation to a wide audience with Tibco Spotfire® software.

CONTENT

In a context where companies are faced with increasingly large volumes of data, data visualisation is becoming a major communication issue.

It allows complex information to be highlighted in a way that a numerical table or a written report cannot.

This course will allow you to masterise TIBCO Spotfire® software and analyse a large volume of data and communicate their interpretation in a visual and interactive way thanks to analytical tools and dashboards.

COURSE OBJECTIVES

Understand the fundamentals of data visualisation.

Explore the Spotfire® user interface to:

- combine and prepare data from different sources;
- build and configure useful and interactive visualisations;
- understand filters, tagging and exporting;

LEVEL

AUDIENCE

Business analyst,
Data analyst,
Anyone who regularly handles
data and wants to communicate
clearly and visually.

PREREQUISITE

Experience in using data
Laptop with Tibco Spotfire
software version 10 (or higher)
installed.

COURSE INSTRUCTOR

Christophe LE LANNOU

Data Expert and certified
trainer

Over 400 people trained in the use
of Tibco Spotfire®.

data visualisation with Tibco Spotfire®

DAY 1 PROGRAM

Introduction to data visualisation:

- | Basic principles and vocabulary familiarisation

Use of Tibco Spotfire®:

- | Configuration of main visualisations, data manipulations, filters, markings, calculated columns, export using a simple database.

DAY 2 PROGRAM

Use of Tibco Spotfire®:

- | Practice on a richer database
- | Introduction to more advanced configuration parameters, joining, geolocation with Internet access, ...

Team workshops:

- | Analyse, prepare and then present an analysis to the whole group

COURSE FEES

Lenght 2 days – 14h

In house 850 £/pers.

MODALITIES

35% Exercices

25% Theory

25% Case study

15% Team workshops

4 to 12 participants

3 to 8 participants

Individual, In-house sessions

FOLLOW-UP AND ÉVALUATION

Expression of expectations upstream

Attendance sheets, regular quizzes, oral presentation (simulation)

Training evaluation form

In-house training: the exercises and data can be adapted to the participants' business specificities.

“ Successful training thanks to the great pedagogy and mastery of the subject from the course instructor.
